**This Evaluation Procedure checks for:**

Feeding Quality: The ability of the media to feed and move smoothly through the machine in various print modes.  
Image Quality: How well the substrate captures all the visually significant attributes of an image.  
Other Quality: How well the substrate behaves in relation to all the weighted combinations of the toner-substrate interaction

Full Evaluation*		Normal Evaluation
Evaluation Class: 1, Simple	Evaluation Class: 2,3,4	
A+		Excellent print result; recommended substrate
A	a	Excellent print result
B	b	Acceptable print result
B-	b-	Acceptable print result, special settings recommended
C	c	Not acceptable result, a problem may occur

\*For Full Evaluation, substrates are tested in enhanced quantities.

**Disclaimer:**

The listed substrates have been tested at Konica Minolta Media Evaluation Centers according to evaluation standards defined by Konica Minolta, Inc. Japan. The media recommendations always refer to the nature of the product used during the mentioned test period. Regarding performance guarantees and warranties for the listed substrate, Konica Minolta is referring to its disclaimer on <https://www.konicaminolta.eu/mediaguide>. For more details, customers may contact the respective media supplier or their local Konica Minolta organization.
